**Why are kitchen chimneys better than exhaust fan?**  
While an exhaust fan eventually expels smoke, it does only after filling your kitchen with smoke and stink. The chimney, on the other hand, performs immediate kitchen ventilation, absorbing and eliminating the smoke

\*T&C Apply

**How much distance should be there between a chimney and a countertop?**  
The ideal distance for best efficiency should be 24-30 inches

\*T&C Apply

FLAME FAILURE  
DEVICE

### What is Flame Failure device in a Hob?

A Flame Failure Device (FFD) in a hob is a safety feature that automatically shuts off the gas supply if the flame goes out, preventing gas leaks and enhancing kitchen safety

### Does Hob consume more gas than cooktop?

Yes, but energy conversion is also high which results in less cooking time delivering greater efficiency.
